

Your Ultra Secure Data Destruction Partner

DiskShred
A Vyta Service

Data disposal can be a tricky path to navigate.

Vyta is here to assist you in the secure and compliant destruction of your data, ensuring complete compliance with GDPR.

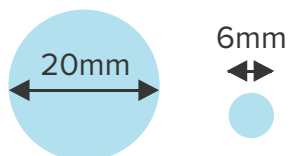

What We Do

We recognise that all clients have unique requirements, therefore we always tailor our approach around you and your needs.

The process is simple, but we go further to get the job done in an ultra-secure, compliant and cost-effective way.

Data Bearing Media Shredding

The majority of clients shred to 20mm. However, no matter what type of storage media you need to destroy, our shredders are so powerful they can reduce all kinds of storage into pieces as small as 6mm.

Types of Data Bearing Media

Hard Disks

External
Hard Drives

PDAs and
Mobile Phones

Back-up Tapes
(DAT/DLT)

Floppy Disks

Portable
Storage Devices

CDs and DVDs

Memory Sticks/
Pen Drives/
Flash Media

CCTV and
Video Tapes

ID Badges,
Electronic Tokens,
PIN Readers

Asset Register

We can track client items throughout the shredding process, ensuring that you have individual confirmation of the data that's been disposed of. We create an encrypted asset register for your highly confidential hard drives and storage media. This includes the type of media (e.g. hard disks, media tapes, CDs), the Asset Tag (serial number or other identifiers), the number of units and the date and time they were shredded.

Hard Drive Removal

Our team are fully trained to assist with the removal of hard drives from your PCs, laptops or servers prior to shredding. Another time saver for clients, helping you stay focused on your core business.

CCTV

We can provide you with encrypted CCTV footage of the process, showing the shredding of your equipment from 3 different angles within the truck. This file is searchable by the serial number and date/ time. This allows you to select the specific part of recording to review the processing on screen. You also have options to select playback speed, and the number of cameras you include in the replay.

Our Employees

All staff are directly employed by Vyta. This way we can maintain consistency of service as well as ensuring that all our staff have undergone security screening through our own bespoke program;

- ✓ Personnel screening completed up to BS7858 Standard.
- ✓ This includes as a minimum: Access NI (CRB) and CPD 'Baseline'.
- ✓ Additional screening dependant on client requirements such as SC and CTC, as well as bespoke programs.

Our Onsite Shredding Process

*You can witness the destruction first-hand in our special guest viewing area

Additional Services

IT Asset Disposition (ITAD)

An alternative to shredding, Vyta securely wipes, and data sanitizes your IT devices before refurbishing and remarketing them, providing you with an additional revenue stream through their resale.

We pride ourselves on our ability to get the greatest value for each device through our unique sales streams, maximising the return for our clients.

Funds raised can offset any expenses, be used to purchase additional services with Vyta or be returned directly to your department.

Upon arrival at our secure facility, all powered items are tracked using our bespoke tracking system, which records:

- ✓ Item Type
- ✓ Collection Date & Site
- ✓ Make/ Model
- ✓ Client Asset Tag/ Serial No.
- ✓ Item Specification
- ✓ Processing Details

DID YOU KNOW?

**In the past 5 years
we have destroyed
more than 2.5
million data
bearing items.**

Vyta ensures all client identifying marks, tags and labels are removed before processing to ensure complete anonymity for the client.

We offer 100% accuracy and accountability for every one of your IT assets collected and provide fully auditable reporting.

We always reuse where possible but if equipment is too old or damaged for refurbishment it will be recycled to meet the relevant local and EU regulations on the processing of electrical waste. Our recycling partners are chosen for their best-in-class recovery rates, ensuring the most sustainable recycling possible when reuse is not an option.

Data Centre Disposal

Vyta's experienced decommissioning experts can remove all applicable data devices from hardware before they are securely shredded on-site.

With DiskShred, clients can escort the devices and witness the destruction first-hand, providing complete peace of mind that the data was never accessed and has been destroyed.

Secure and Efficient

Our state-of-the-art shredders can destroy hard drives at a market-leading rate. For larger jobs, we will utilise multiple vehicles on-site.

To maintain our high standards, we will not subcontract any of this work, using only our own vehicles and staff.

DID YOU KNOW?

**In the last 3 years we have spent
£175,000 on security, training and
accreditation.**

Media Storage Containers

We can provide secure storage on your premises with our **Media Storage Containers**. Our storage bins eradicate risk by providing a single, internal location for staff to collect and store redundant, data bearing media.

It also ensures that you fulfil your regulatory requirements of holding media in a secure location. These containers are fully lockable.

Storage
Container.**

Compliance

Compliance: exciting and absorbing? Maybe not to everyone, but at DiskShred it's an area we know inside out and back to front.

It's another reason why people like working with us and our rigorous attitude to regulation and compliance is designed to protect your organisation from the pitfalls and perils of data security. We are fully compliant with the below legislation and are thoroughly audited having achieved the following certifications and accreditations:

ADISA CERTIFICATION DIAL 3 ALL SITES

Why Organisations Use DiskShred

- ✓ Purpose built shredding vehicles
- ✓ Our state-of-the-art shredders can destroy hard drives at an industry leading rate
- ✓ Searchable CCTV evidence of the destruction process available upon completion
- ✓ Most accredited pan-European onsite shredding organisation
- ✓ 82% of business comes from repeats and referrals
- ✓ Most reliable and cost-effective solution in Europe for onsite data destruction
- ✓ DiskShred is one of many services provided by Vyta as part of a complete lifecycle solution.

Don't Just Take Our Word for It

Here is a sample of some of the feedback we have had over the last few months:

"I just wanted to say thanks for organising the DiskShred so fast. Mark arrived on-site this morning and shredded 195 disks for us. He was very friendly and efficient, and got the job done very quickly. I was very impressed!"

- *Global Online Marketplace*

"I just wanted to pass on my sincere thanks to your driver Colin today who came along and shred our hard drives and tapes. A credit to the company."

- *Private Medical Insurance Provider*

"Brilliant job by the guys last week, very efficient process, thank you to all concerned and for arranging the visit."

- *Accounting Firm*

“”

**Excellent service
yesterday - the
operative who
arrived was really
helpful and we
were able to
oversee the entire
process. Very
impressed!**

LEGAL FIRM

No Disks. No Data. No Doubt.
